

PRODUCT DATA SHEET

ARCHITECTURAL STEEL DOORS

Steel doors from AMC combine the strength and security of steel, with the elegant design and appearance of true architecturally designed features.

AMC liaise with the client from the initial design concept through to installation, to ensure that our doors meet every expectation and design criteria.

If doors from our standard range do not suit, we are able produce doors to virtually any size or design.

Finishes available range from timber effect to clad to match any structural finish.

Emergency doors, plant room doors with ventilation louvres, or multiple glazed entry door systems for prestigious developments; all are within our capabilities.

All fire resistant doors are certificated to the required level, and high security door sets are certified to LPS1175 level 4.

Ballistic resistant doors and windows are also available, and we would be pleased to discuss this product range with you.
