

AMP1000 ECONOMY BOLLARDS

Design Concept

A range of 220mm diameter bollards featuring fixed, semi-automatic and fully automatic units, at very competitive prices.

Designed to offer security and traffic control facilities to sites where large volumes or tight budgets require the most cost effective solutions.

The 4mm thick steel construction provides a good level of security and the stylish design complements any location or environment.

AMC are able to supply fully linked multiple bollard systems with any type of access control system.

Bollard Features

- Discreet and stylish design.
- Simple installation and low maintenance requirements.
- Single or multiple bollards may be supplied with access control systems to suit the requirements of any site.
- Available as fully automatic semi-automatic or fixed to allow suited installations at larger sites.
- Finished in Anthracite, Orange or Ivory paint as standard.

AMP1000 ECONOMY BOL-

Bollard Technical data

Height	Product Code	Type	Diameter	Wall Thickness	Standard Finish	Optional Construction	Raise and Retract Speed
600mm	AMP1000F	Fixed Bollard	220mm	4mm	Painted Anthracite, Ivory or Orange	Silk effect, Stainless Steel	6cm/sec
	AMP1000A	Fully Automatic	220mm	4mm			

Locking Detail

The semi automatic (lift assist) version is fitted with a high performance weather proof lock. When unlocked the bollard raises with the assistance of an integral gas strut. To retract, a light push on the unit is all that is required.
