

# TYPE B-64 FENCING

Our B-64 range is designed to offer a practical, stylish and economical fencing system for domestic and commercial applications.

Manufactured to the same rigorous quality standards as our high security systems, the B64 system is a cost effective alternative to low security chain link or similar fencing. The benefits over such fencing systems are the added rigidity and security offered by B-64 welded steel panels, and the galvanised and powder coated finish which ensures a long and maintenance free lifespan.

- Rigid welded mesh fencing at chain link costs.
- Modular, secure fencing at highly competitive prices
- Galvanised and powder coated for maximum maintenance free lifespan.
- Modular system allows simple installation.
- Designed to blend with any environment.

## SPECIFICATION

Mesh Dimensions:	50mm wide by 200mm high.
Horizontal wire diameter:	6mm
Vertical wire diameter:	4mm (with 8mm diameter at panel edges).
Mesh configuration:	Double horizontal wires either side of single vertical wires, resistance welded at each intersection.
Standard Finish:	Hot dip galvanised to ISO 1461/1999 after welding, and polyester powder coated in one of the following colours: Grey, RAL 7023; Green RAL 6005; White RAL 9010; Anthracite RAL 7016.
Non Standard Finish:	A wide range of RAL colours are available, please call for price and availability.
