

CCTV and ACCESS CONTROLS

The need to ensure that you have a totally secure facility is now more important than ever before. AMC are able to Integrate all individual security measures into one centrally controlled system.

Access controls ranging from the single keypad entry systems to a gate, to a full biometric control system throughout a secure facility are supplied and installed. Training for your personnel, along with technical and maintenance services are available for emergencies and system upgrades.

Coupled with our access control capabilities, we supply integrated CCTV systems to provide the full control core to your security system. Automatically activated or manually controlled, cameras, single or multiple locations, AMC are able to supply and install a system configured to your exact needs.
