

Fold Down Parking Post

Integral Lock Collapsible Post

A simple and effective post that is ideal for reserving individual car parking spaces. It can also be used as a visual deterrent to restrict access into residential or commercial driveways. The post can be locked in the upright or lowered position. The floor mounted base is secured to a prepared concrete foundation by 3 no. M12 Anchor Bolts.

In the case of multiple orders locks can be supplied with the same keys or with keys to differ. There is a rigid version of the post available. Anchor bolts as well as a build in base option can be supplied at an extra cost.
