

Installation Services

INSTALLATION

AMC is able to provide a full installation service to support all of our products, including ground works if required.

Supply, installation and commissioning of access control and CCTV systems, or integration with your existing system is also a core activity.

SUPERVISION AND TRAINING

For many of our overseas Clients we provide our engineers to train local staff in the correct installation procedures, and supervise the installation works.

We also offer product, and service support training for to our Clients.
