

## Recessed Folding Bollard

Our recessed folding bollard is installed within a steel box recessed into the ground.

When not in use, the bollard lays within the recessed box, concealed with a steel lid. A simple lift and drop movement allows the bollard to be fixed in the upright position.

Manufactured from mild steel with a painted finish, the bollard may be supplied in a range of standard RAL colours to match any environment.

### Dimensions:

Height above ground:	750mm
Base diameter:	50mm
Root depth:	450mm
