

# PRODUCT DATA SHEET

## MANUAL RISING BARRIER

The manual barrier provides an effective yet low cost solution to a wide variety of parking, road access and traffic management requirements.

The durable hard working barrier may be locked in either the vertical or horizontal position providing excellent security to any area as required.

Constructed from high quality steel and utilizing a strong yet lightweight aluminium barrier beam counterbalanced by supporting weights.

Our manual barrier is ideal for situations where a fully automated barrier entry system is not required.

### Specification:

**Construction:** Pivot assembly and counterweights made from mild steel with heavy duty shaft and bearing blocks.

**Dimensions:** Span, from 3metres to 7metres. Pole diameter 75mm.

**Finish:** Red or yellow, with black or white stripes to the boom. Mild steel sections powder coated red or yellow.

**Fittings:** Complete with boom tip support pole. Padlock not supplied.

**Optional fittings:** Folding skirt to barrier arm: STOP or NO ENTRY signs:
